## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4-5 and 16-34, drawn to methods or devices for generating and using tables to control commands for an application of computer system or a device, classified in class 707, subclass 104.1.
- II. Claims 6-15, drawn to a voice user interface for recognizing a voice utterance and producing corresponding input for execution of a program on a computer, classified in class 704, subclass 275.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as generating databases or database structures. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
